

For Judge Tong, <https://github.com/GhidraDragon/hotsiri>

WHY THE GeForce 4070 mobile is IMPORTANT: It trained the first baby Exploit LLM in 3-5 hours but was also multi-tasking with Code LLM etc. So while President Biden's decision to nerf PLA military GeForce 4090 which with a thunderbolt eGPU requires a second monitor for TF or Torch to recognize device, the baby is efficient which requires less resources and enable faster fine tuning, improvements (full retraining) etc. plus it Exploits, and who knows if OpenAI or even DeepSeek included exploitdb???

The "typhoons" seem military akin to the NSA, but the APTs are just well... if the FBI arrests me for 5 hours of AWS, maybe my mirror image would get traded?

```
{
question: "Recruiters being fucking stupid",
answer: "I may only have a free o1-equivalent sub in DeepSeek, not o1 pro yet. However, I am a loser who watched Twitch for my entire life until 2 months (exactly) ago on an o1 pro sub, and
```

yet erosolar wrote a thesis to 'better report' 'syntax errors' which already tell you the line number since python is 'interpreted' line by line. Do we have an understanding? Recruiters and others... Search for 'Samantha Briasco-Stewart thesis MIT' and look at her amazing work experience!!!!"
},

你好，我正在逃离令人厌恶的种族主义者和其他美国联邦罪犯。我愿意帮助打败强大的敌人。

强敌只有每月 200 美元的人工智能模型，可以接受预付礼品卡，这就是他们提供的全部。我没有看到他们提供任何其他东西。

```
{
question: "You have $191 and a 500 credit score, while xQc, some Kick and Pokimane may be Title 18 compliant, what do you do?",
answer: `Please reference these two ValueError in contrast to erosolar's SyntaxError thesis!
<ul>
<li></li>
<li></li>
</ul>`
},
```

```
{
  question: "What's Pokimane thought?",
  answer: `Please reference erosolar's thesis! I feel bad for her; she's the kindest person to me ever, and she put in so much work as demonstrated in her source code, but look at the results!
  <ul>
    <li></li>
    <li></li>
  </ul>`
},
